

Step 1: Download the software

- Visit our homepage
- Open "Download"
- Select a product category, e.g. DCX
- Select the software and click on Download

Step 2: Software installation

- Execute the setup file "Setup_xxx.exe" as **administrator**
- Confirm the MS-Windows messages as follows: Click on
 - "More Information" and
 - "Run anyway"
- Follow the instructions of the setup program
 - Install the software for "Anyone who uses the computer"
- Finally you find the program icon at the desktop or program menu

Activate the license

If the window shown below appears after starting, the software license is not yet activated.

What do you need for activation?

The **invoice number** and the **installation key**. Tipp: Double-click on the installation key number to copy it to the computer clipboard.

Request the activation via Web-Form

Press the button „Release license...”. Your default internet browser displays a form. Enter the required data. Finally submit the form. Note: **You will be informed about the activation by EMAIL.**

Note: Before the activation request, the programme must be started once while the PC is connected to the Internet. After that, you can start the licence release request.

Important: A refund is no longer possible after the licence has been activated. Test the software in DEMO mode in advance.
